

# Master Key

## A unique two-day program for self growth

### TESTIMONIALS

*"I entered this workshop with a particular objective and got far more than expected. I have clear tools and techniques to be in a state of awareness, in a state of bliss at all times now." – Sharat Talwar*

*"I came to the workshop with a sense of curiosity. It's helped me rethink a lot of things that I believed were black & white. My huge take away from the workshop is that I just need to be aware and not react to a situation. And sometimes inaction can be an appropriate response in a given situation." - Sudeshna Chatterjee*

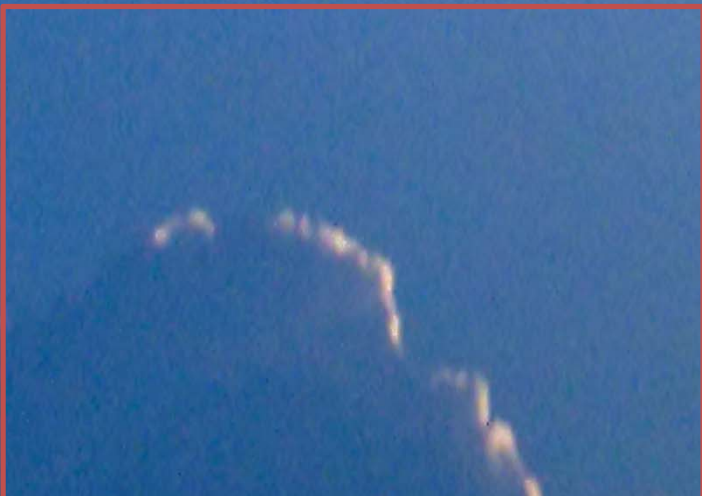

*"I came here with a lot of questions and I have found all the answers. I not only feel great but so much lighter!" – Indu*

*"I came here to just spend a day but I'm going back with a life time experience. The word awareness may sound very slow and low, but personally there are a lot of actions we do knowing that it is not correct, and still we carry those actions. In this workshop now I know how to be aware of these actions and a lot has changed for me for a life time and I wish everyone who attends this workshop a very beautiful life ahead." - Rohit Khurana*
